Superfici e innovazione – ricerca estetica fra design e artigianato

Disegniamo e sviluppiamo nuove superfici dedicate per brand e studi di architettura, il cuore del nostro lavoro sono la ricerca e l'innovazione.

Ci occupiamo di tutto il processo creativo : dall'idea al prodotto finito.

Le nostre collezioni di pavimenti e rivestimenti sono il frutto della collaborazione con i nostri produttori per tracciare nuovi percorsi e dare un nuovo valore alle competenze artigiane.

Lavoriamo per migliorare la sostenibilità, progettiamo le nostre collezioni con il pensiero di costruire ambienti con materie prime di alta qualità e durevoli nel tempo, perché la scelta delle risorse aiuti a migliorare il mondo.

Una ricerca estetica e sostenibile per il recupero della bellezza delle materia prime e la loro capacità espressiva.

Le nostre cementine hanno già un trattamento protettivo che non fa uso di sostanze chimiche.e sono pronte per l'uso dopo la posa. Non necessitano di trattamenti di mantenimento

Surfaces and innovation - aesthetic research between design and craftsmanship

We design and develop new dedicated surfaces for brands and architects, research and innovation are the core of our work.

We take care of the entire creative process: from the idea to the finished product.

Our collections of floor and wall tiles are the result of collaboration with our producers to trace new paths and give a new value to artisan skills.

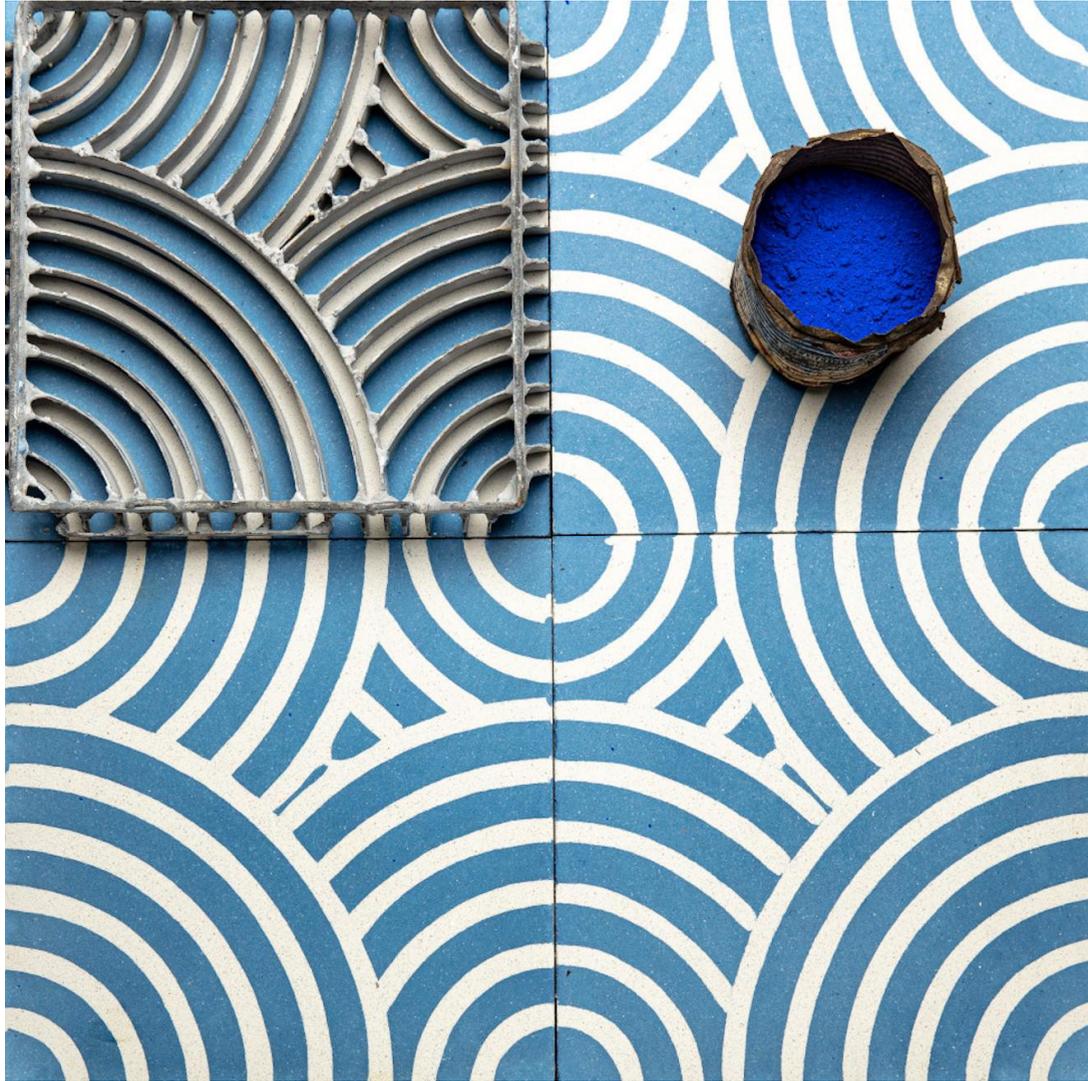

We work to improve sustainability, we design our collections with the thought of building environments with high quality and long-lasting raw materials, so that the choice of resources helps to improve the world.

An aesthetic and sustainable research for the recovery of the beauty of raw materials and their expressive capacity.

Our latest collections are dedicated to cement tiles.

We have captured patterns hidden within the play of shapes and colors of the kaleidoscope, by the circle, symbol of expansion that conveys the sense of movement. The alternation of opposites inspired by the Orient, with contrasting and complementary specular lines.

Our cement tiles already have a protective treatment that does not use chemicals.

Abbiamo catturato pattern nascosti dentro i giochi di forme e Colori del caleidoscopio, il cerchio simbolo di espansione che trasmette il senso del movimento o l'alternanza degli opposti ispirati all'oriente, dalle linee speculari contrastanti e complementari.

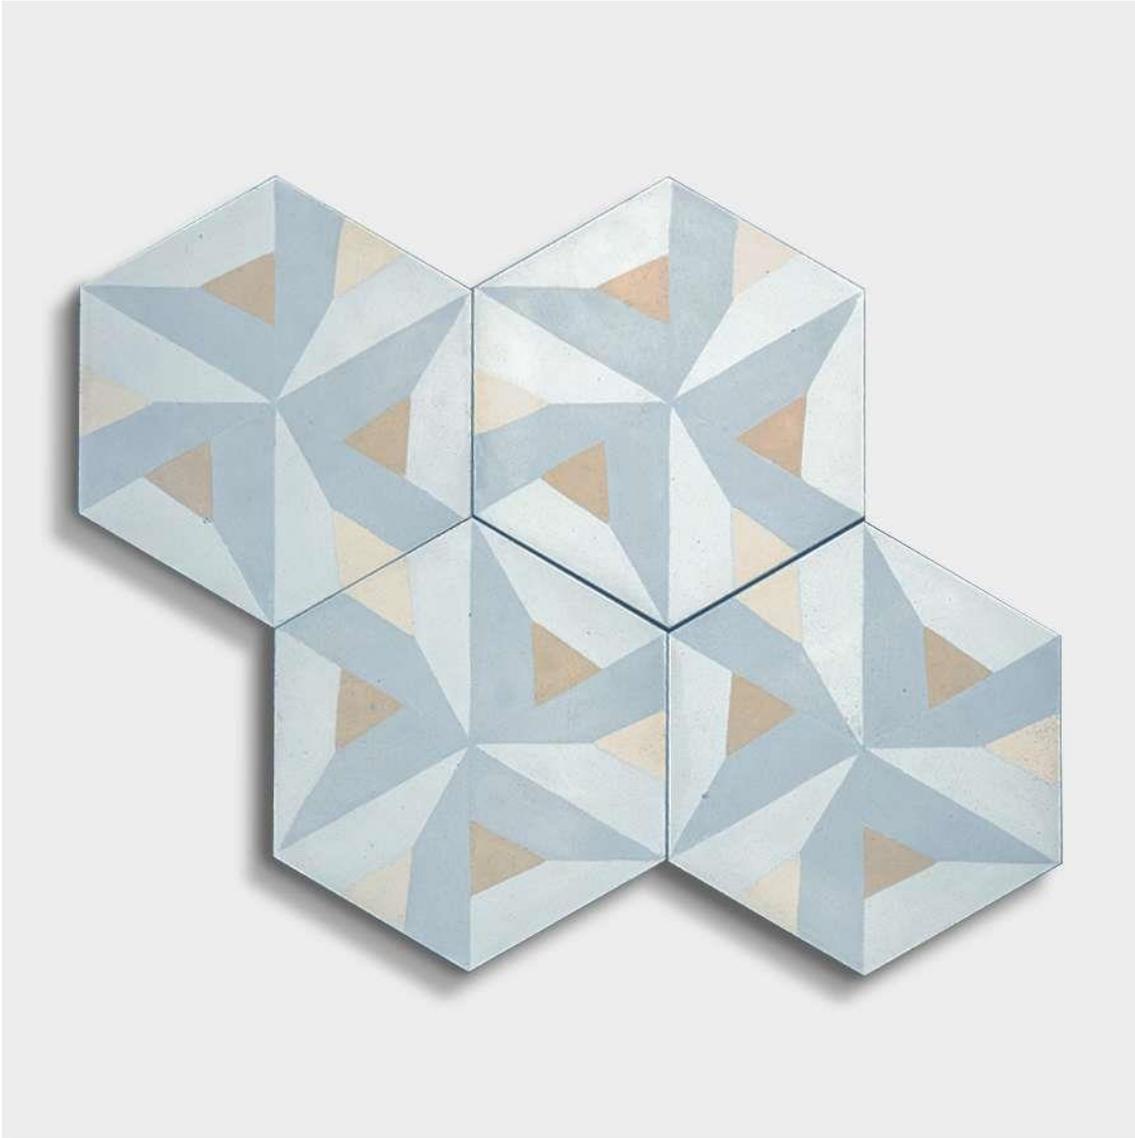

Le nostre cementine hanno già un trattamento protettivo che non fa uso di sostanze chimiche.

We have captured patterns hidden within the interplay of shapes and colors of the kaleidoscope, the circle symbolizing expansion that conveys a sense of movement or the alternation of opposites inspired by the Orient, from the contrasting and complementary specular lines.

Our cement tiles already have a protective treatment that does not use chemicals.
